

Cocktails on the Bar.

The Rose Theatre have been approached by Diageo who provide on draught cocktails for bars.

Installation and pumps are free and with no contract (however we would need Stuart the electrician in to add a double plug socket in for the cooler). The cocktails come in bags of boxes and each box contains 80 servings per box and purchased through our normal supplier (Molson Coors) at £134.00 (3 different flavours). So each cocktail would cost us an average off £2.06 per glass.

Once a box has been opened, the mix only has a lifespan of 4 weeks so if its not sold then its pulled off and tipped away.

For consideration

If Councillors would like to take up this opportunity, they will need to consider the cost of the cocktails per glass and the frequency of purchasing the cocktails so we have minimum wastage. NB There is roughly a 12-week waiting list for installation.
