

### **Electrical inspection and testing**

Connect Midlands has carried out electrical testing for the Rose Theatre. They have also fitted a double plug socket behind the bar (free of charge) for the cocktail equipment which was considered at last months Rose Committee Meeting.

### **Air conditioning**

AA Cooling have completed their latest maintenance service. The screen required to fully operate the AC unit will be fitted on 21<sup>st</sup> July.

### **Art Class**

Mr Derek Powell holds a free art class every Monday at the theatre. No charge is made for this weekly event providing it is held on an evening when the theatre would already be open and staffed.

As in previous years, the art class is again seeking permission to have the whole theatre free of charge to hold an art exhibition of the works produced over the year. The date suggested for this is Friday 23<sup>rd</sup> September 10am-6pm.

Councillors are asked to confirm if they are happy for this event to take place again this year.

### **Display screens.**

The Committee have suggested that it would be advantageous to have display screens in the theatre which will allow us to promote upcoming events in the Rose Theatre and in the town, and also to promote events in neighbouring theatres. Hirers could provide digital copies of their publicity material for showing as well.

Quotes have been received for the screens and Councillors are asked to consider funding this improvement – see attached quotes

### **Rugeley Musical Theatre Company.**

We have been contacted by Rugeley Musical Theatre Company (RMTC) about a charity concert to be held in the Rose Theatre in October in Aid of children's Air Ambulance.

RMTC are a registered charity and therefore receive the charity rate already for any productions put on at the theatre.

Councillors are asked to consider offering RMTC the use of the stage extension free of charge (should it be required) and/or no charge for the 'get in' 10am-6pm (£10.50 per hour totals £84).
