

Item 22
Mindfulness Garden

The landscape designer has come back with the outline draft design of the garden and 'stream' proposed for the centre of town.

The design accommodates seating for wheelchair users and pushchairs to be adjacent to fixed seating units. The 'stream' would be made from stone/bonded gravel etc and would start at the planting area adj to Costa and would end at the start of the real stream – so reflecting the water traveling under the town centre. Existing street furniture would need to be relocated and reused around the site.

The plans are currently with Staffs County Council and Cannock Chase District Council for their approval. Once we have this, we will contact local companies to seek labour support and donations of materials and suitable development timescale.

The Queens Jubilee Bench is due to be delivered to RTC end May 2022.
